This book is part of a series, with one book for each number up to Number Ten. They are all great, and work really well as a set. We started these books when my . In 3 of them, the first number is smaller than the second number: a 1 In 1 of them, the third number lies between the first number and the the.

The Numberlies are characters who live in Numbertown who aim to help children learn to count. This is story number one which intends to be fun and to.

The second case of $A(2) = 4$ does not lie in any of the intervals (1 to 3, nor 5 to 10, nor any of the ones below those two), so this would be a false for that value.
